FTSE Global Equity Index Series review schedule 2026

FTSE Global Equity Index Series review schedule 2026

	Semi-annual review March 2026	Quarterly review June 2026	Semi-annual review September 2026	Quarterly review December 2026
Index rebalance market capitalisation data cut-off^{1 & 2}	31 December 2025	N/A	30 June 2026	N/A
Liquidity testing period³	1 January 2025 to 31 December 2025	N/A	1 July 2025 to 30 June 2026	N/A
IPO/U.S. de-SPAC/spin-off review period⁴	4 August 2025 to 31 December 2025	2 October 2025 to 30 April 2026	3 February 2026 to 30 June 2026	2 April 2026 to 30 October 2026
IPO/U.S. de-SPAC/spin-off cut-off to meet three-month minimum trading requirement⁵	1 October 2025	2 February 2026	1 April 2026	3 August 2026
IPO/ U.S. de-SPAC/spin-off market cap cut-off⁶	31 December 2025	30 April 2026	30 June 2026	30 October 2026
Quarterly free float and share changes cut-off (only updates captured up to and including this date will be processed at the index review) ⁷	30 January 2026	30 April 2026	31 July 2026	30 October 2026
Nationality announcement date	4 February 2026	N/A	4 August 2026	N/A
Release of FTSE GEIS Monitor List (GML)^{a & 10}	13 February 2026	15 May 2026	10 August 2026	9 November 2026
Release of indicative review files and technical notices (detailing proposed index, free float and share in issue changes)	20 February 2026	22 May 2026	21 August 2026	13 November 2026
Release of GEIS Enhanced Indicative Review File (GEIR)¹⁰	20 February 2026	N/A	21 August 2026	N/A
Query period^b (window for clients to query the data visible within the files)	23 February 2026 to 6 March 2026	25 May 2026 to 5 June 2026	24 August 2026 to 4 September 2026	US securities 16 November 2026 to 27 November 2026 Non-US securities 16 November 2026 to 4 December 2026
Release of final index review files – incorporates any revisions to indicative file	6 March 2026	5 June 2026	4 September 2026	4 December 2026

^a FTSE GEIS Monitor List is delivered monthly to subscribing clients. The dates shown above reflect the monthly file deliveries that align with the applicable index review announcement months. Other monthly deliveries are not shown in this table.

^b FTSE GEIS preliminary review changes will be released in conjunction with the Russell US preliminary reconstitution announcement. The query period for the shares in issue and free float changes will run for two weeks for US traded securities (excluding N shares), consistent with the Russell US Indexes, and three weeks for non-US traded securities within FTSE equity indices.

As a result, US traded securities (excluding N shares) enter lockdown from **30 November 2026**, and non-US traded securities enter lockdown from **7 December 2026**.

	Semi-annual review March 2026	Quarterly review June 2026	Semi-annual review September 2026	Quarterly review December 2026
Lockdown period[°] (open of)	9 March 2026	8 June 2026	7 September 2026	US Securities 30 November 2026 Non-US securities 7 December 2026
Review effective date (open of) ⁸	23 March 2026	22 June 2026	21 September 2026	21 December 2026

Note: dates may be subject to change. Clients will be notified of any changes.

[°] FTSE GEIS preliminary review changes will be released in conjunction with the Russell US preliminary reconstitution announcement. The query period for the shares in issue and free float changes will run for two weeks for US traded securities (excluding N shares), consistent with the Russell US Indexes, and three weeks for non-US traded securities within FTSE equity indices.

As a result, US traded securities (excluding N shares) enter lockdown from **30 November 2026**, and non-US traded securities enter lockdown from **7 December 2026**.

FAQ

1. Data cut-off date for the semi-annual reviews in March and September

March review

Data cut-off will be the last business day in December.

September review

Data cut-off will be the last business day in June.

2. What happens in June and December?

Normal quarterly changes such as the following will be processed in June and December:

- Industry Classification Benchmark (ICB) updates
- Capping
- IPOs that failed to qualify as fast entrants
- Eligible U.S. de-SPAC's, following the expiry of the longest stated lock-up period within the applicable data cut-off window
- The large/mid/small/micro status of companies resulting from a spin-off. Please note: any companies resulting from a spin-off below the exit threshold will be deleted.

Additionally in June 2026, all normal quarterly share and free float updates will be implemented **regardless of size** (i.e. the respective 1% and 3% buffers will not be applied). Please refer to the following FAQ document for further details:

[Shares and Free Float Maintenance FAQ.pdf](#)

In March, September and December 2026, all normal quarterly share and free float updates will be implemented subject to breaching the respective 1% and 3% buffers.

3. Liquidity testing period

A full 12-month liquidity test will be conducted in both the March and September semi-annual reviews. Please refer to section 2.1 of the [Guide to calculation method for the median liquidity test](#).

Testing periods

Review month	Liquidity testing period
March	First business day of January 2025 to last business day of December 2025
September	First business day of July 2025 to last business day of June 2026

For illustration purposes: liquidity testing period for the March 2026 review will be from 1 January 2025 to 31 December 2025.

4. IPO, U.S. de-SPAC and spin-off review period

As well as being reviewed at the March and September semi-annual reviews, IPOs from all regions (which failed to qualify as fast entrants), U.S. de-SPAC's following the expiry of the longest stated lock-up period within the data cut-off window, and the companies resulting from a spin-off will also be reviewed in June and December.

Note that spin-off companies that had been removed from the index due to not trading for 20 business days from the ex-date of the distribution but which subsequently begin trading will be treated as a new issue for the purposes of assessing eligibility and reviewed at the following index review.

Liquidity will be tested over the date ranges shown below.

Review month	IPO period assessed
March 2026	4 August 2025 – 31 December 2025
June 2026	2 October 2025 – 30 April 2026
September 2026	3 February 2026 – 30 June 2026
December 2026	2 April 2026 – 31 October 2026

For illustration purposes: for the March 2026 review, the cut-off date for index data is 31 December 2025. However, only those IPOs, U.S. de-SPACs and spin-offs with three months' liquidity as of 31 December 2025 will be considered for index inclusion in March 2026. Therefore, to meet the minimum three-month trading requirement, an IPO, U.S. de-SPAC or spin-off would need to have listed by 2 October 2025.

5. IPO, U.S. de-SPAC and spin-off cut-off date to meet minimum three-month trading requirement

Review month	Minimum IPO, U.S. de-SPAC and spin-off listing date
March 2026	1 October 2025
June 2026	2 February 2026
September 2026	1 April 2026
December 2026	3 August 2026

6. Market capitalisation date used to determine IPO, U.S. de-SPAC and spin-off eligibility in June and December

Index membership of eligible IPOs, U.S. de-SPAC's and the companies resulting from a spin-off will be determined by referencing the full company market capitalisation at close on 30 April* or 31 October* (as appropriate), against the entry levels for large, mid, small and micro as set in the March or September review (as appropriate), index adjusted to reflect the subsequent change in performance of the appropriate regional index. Please note the minimum market cap requirements for the investable inclusion and exclusion levels are USD 150 million and USD 30 million respectively.

*The previous trading day's data will be taken if any of the dates above are on a non-trading day.

7. Quarterly free float and shares in issue changes

March 2026

The cut-off date for normal quarterly share and free float changes will be the last working day in January.

For illustration purposes: for the March 2026 semi-annual review, the cut-off date will be Friday 31 January 2026.

June 2026

The cut-off date for normal quarterly share and free float changes will be the last business day in April.

For illustration purposes: for the June 2026 quarterly review, the cut-off date will be Wednesday 30 April 2026.

Please note: in June 2026, all normal quarterly share and free float updates will be implemented **regardless of size** (i.e. the respective 1% and 3% buffers will not be applied). Please refer to the following FAQ document for further details:

[Shares and Free Float Maintenance FAQ.pdf](#)

September 2026

The cut-off date for normal quarterly share and free float changes will be the last business day in July.

For illustration purposes: for the September 2026 quarterly review, the cut-off date will be Thursday 31 July 2026.

December 2026

The cut-off date for normal quarterly share and free float changes will be the last business day in October.

For illustration purposes: for the December 2026 quarterly review, the cut-off date will be Friday 31 October 2026.

Quarterly minimum foreign headroom changes

Minimum foreign headroom tests are conducted in conjunction with the March, June, September and December quarterly reviews.

For constituent securities, minimum foreign headroom is tested based on data as of the quarterly shares in issue and free float cut-off date in March, June, September and December.

For illustration purposes: for the September 2026 review, the quarterly shares in issue and free float cut-off date will be 31 July 2026.

For non-constituent securities, minimum foreign headroom is tested based on data as of the review cut-off date in March, June, September and December.

For illustration purposes: for the September 2026 review, the review cut-off date will be 30 June 2026.

Please note:

- The headroom test will take into account any foreign ownership limit changes scheduled to take effect up to and including the review effective date, based on information as of the shares in issue and free float cut-off date.
- The China and India markets provide disclosures of securities that are close to or have reached permissible foreign ownership limits; therefore, any securities that are being removed from the North Bound Stock Connect Buy List (China) or being added to the Red Flag and/or Breach List (India) (based on data as of one day prior to the review announcement date) will not be eligible for index addition.

8. Rebalance effective date

The effective date will be from the open on Monday following the third Friday of March, June, September and December.

9. Impact of country reclassification changes

FTSE classifies countries included in its global indices into one of three categories: developed, advanced emerging and secondary emerging.

FTSE conducts an annual review of all countries currently included in its global indices and those countries being considered for inclusion, the results released in September of each year. A notice period of at least six months is provided before changing the classification of any country.

Below we illustrate the review process incorporating a country classification change.

The following should be read in conjunction with the FTSE Global Equity Index Series ground rules. Separate country change FAQs will also be available on the FTSE Russell website.

Review process – defining regional/index universe

Countries are grouped into the following regions for the purpose of the reviews:

- Asia Pacific ex China ex Japan
- China
- Japan
- Developed Europe
- Emerging Europe

- Middle East and Africa
- USA
- Canada
- Latin America

The 100% regional universe includes all eligible companies assigned the nationality of countries that are classified as eligible for inclusion as of review effective date.

The top 98% of the regional universe forms the index universe.

Reviewing constituents for the indices

To reduce turnover, existing GEIS constituents will retain their current large/mid/small/micro-cap status and will be subject to the new regional buffer zones to determine their new index status within the allocated region. However, constituents of newly eligible countries will be treated as non-constituents.

Inclusion/exclusion percentage levels by investable market capitalisation

The percentage levels by investable market capitalisation for all regions will be determined based on the respective regional small cap index as of cut-off date. Please note the minimum market cap requirements for the investable inclusion and exclusion levels are USD 150 million and USD 30 million respectively.

For illustration purposes: for the March 2026 semi-annual review, the investable market capitalisation buffers will be calculated based on the Small Cap Index as of 31 December 2025.

Liquidity

For the purposes of liquidity, an existing FTSE GEIS All-Cap constituent will remain considered as a constituent following a country reclassification. As such, based on a constituent's median daily trading volume per month, it must turnover at least 0.04% of its shares in issue (after the application of any free float weightings) for at least eight of the 12 months prior to a full market review.

In the case of a country reclassification from FTSE Frontier to FTSE GEIS All-Cap, stocks will be considered as non-constituents. As such, based on a non-constituent's median daily trading volume per month, it must turnover at least 0.05% of its shares in issue (after the application of any free float weightings) for at least 10 of the 12 months prior to a full market review.

10. What are GML and GEIR, and how do they support the FTSE GEIS index review process?

The **FTSE GEIS Monitor List (GML)**^d is a monthly, comprehensive dataset that provides security-level attribute data, including shares outstanding, free float, nationality, and market capitalization, for all equities eligible for inclusion in the FTSE Global Equity Index Series.

The **FTSE GEIS Enhanced Indicative Review File (GEIR)** provides a consolidated overview of the semi-annual FTSE GEIS rebalance. Launched in August 2025, GEIR covers the full eligible global equity universe, including securities that are not part of the announced index membership changes. The file reflects data as of the index rebalance market capitalisation data cut-off date and includes inclusion and exclusion rationales, providing additional transparency into announced review outcomes and supporting analysis of methodology application.

The FTSE GEIS Monitor List and FTSE GEIS Enhanced Indicative Review File are available to subscribing clients only. Please contact your FTSE Russell sales representative or local client experience team for more information regarding product licensing or to receive sample files.

^d The data included in GML does not confirm final index membership, index review changes, or the final data used in any FTSE GEIS index review. FTSE GEIS index changes are confirmed only through the official index review files and announcements published on the index review announcement date.
